What are the future prospects?

Educational Multimedia development is a rapidly growing area and there is a dearth of qualified professionals. Indian e-learning industries have gained a great deal of acceptance internationally for developing on-line courses. The industries are looking for trained professionals in the areas of instructional design, content development and story-board development.

What is Instructional Design?

Instructional design is a discipline which focuses on the systematic process of planning any teaching-learning process and developing an effective educational system. It also involves micro-planning and material development for actual teaching-learning activity. Instructional Design is essential for developing an effective educational multimedia or a web-based course.

How are MET-CA pass-outs placed?

Since there is a dearth of Instructional Designers, the students are placed as Project Trainees during their fourth semester. They earn a monthly stipend ranging from Rs. 8000/- to 10000/- during their internship. Most of the students are immediately absorbed in the same industry or are employed by other industries immediately after the completion of the course, even before their final results are out. They are generally placed on the starting salary ranging from Rs. 16,000/- to 20,000/- and above. The e-learning Industries where our students are working are Accenture LionsBridge, Tata Consultancy services Systems, Aptech, School Net (IL&FS), Reliance, WNS, City Group, Gurukul Online etc. and educational organizations like SP Jain Institute of Management Studies.
